

Lake Committee Report. Meeting October 6, 2025

CREEL SURVEY

The committee will select the winners from the creel survey respondents for the gift certificates at a time in October.

BEACH TESTING

The beach testing has concluded for 2025. There were no beach closings after the July closing. The committee will be

discussing ways to address geese issue in 2026. This includes a USDA program that removes geese.

2024 LAKE REPORTS

Aqua Link continues to monitor the water quality of the lake. There is an abundance of snails in the lake especially at the

beach at the clubhouse. The snails have been identified as a non-native snail. The committee prepared information on

addressing the snails and will continue to monitor the lake.

FISH HABITATS

We are proposing to install fish habitat structures in 2026 instead of stocking the lake.

In order to continue to keep Walker Lake healthy, we remind all residents to keep pets off of the beaches and to have their septic systems pumped and inspected regularly.
