

The Lake Committee met on November 7, 2020 to discuss committee duties since the resignation of Peter Wulfhurst last month. Main responsibilities include:

- Water testing as per PA Dept. of Health during the swimming season
- Water treatments for good lake health
- Fish survey to assist in identifying stocking needs
- Dam maintenance as per PA DEP
- Goose egg control as per US Fish and Wildlife Service

We are still identifying other areas of responsibility.

The Emergency Action Plan has been signed by the proper officials and submitted for approval to PA DEP. We await their comments before finalizing and distributing the plan.

We are waiting for the Fishery Study and the Water Quality Report from Aqua. This is not expected until early 2021.

No updates to report on the dam inspection report or the dam repair plan.
