

Security Report July

Security is working harder then ever during June going into July. July 4 came and went with less fireworks then before. Signage was posted on all WWLA properties about fireworks usage not allowed. Our daily and nightly patrols are working. I have received many positive comments while walking my dog thru the community about the visibility of security driving around. Of course there is still issues of cars not having the proper WWLA permits at the beach or boat launch and beach tags. Notices are left on vehicles and beach goers are confronted about tags. We have seen an increase in membership being paid on both sides of the Lake I was informed.
