

## Security Report August

Well it is the end the Summer coming up, it has been quite a season for our first year back with security. I would believe it was successful for such a unique year. Walker Lake became a safe haven for many people to escape the pandemic. Many weekenders became full time residents with many visitors who were not used to following rules. Security had its work cut out with educating many visitors and residents to make sure to have their beach passes car stickers and boat stickers in place. Mike from Homeland Security worked many hours to enforce these rules with a lot of push back from West shore beach individuals. We are working hard to keep everyone safe and learn from our first season in dealing with a unique year. Any suggestions for improvement to help security keep us all safe are greatly encouraged, please send any helpful comments to the office, we are always looking for help.
