

Security Report June

Security is in full swing now. Covering weekends and nights as needed. We have had much praise and comments about security enforcing what we have always had, rules! Everybody is commenting about beach passes and car stickers, but its working . More members are paying their dues, members and nonmembers are noticing security checking for passes. Boaters that leave their cars at the boat launch without a car stickers are getting violation notices on their cars, same for the beach areas. I have witnessed a few times where members are now worried about not complying and making sure they have their beach passes and car stickers.

Members actually have commented to me that they like that security is enforcing beach passes and car stickers and making sure that everyone has one. This is of course proves it to be fair that everyone using our beaches and boat launch is a member in good standing. Security is provided a weekly updated list of all current members and noncurrent members. This is also helping when someone complains they never received their beach passes. Security now has the most current information so they can handle the situation. We also have the few that think they do not have to pay anything and still can use our beautiful lake free of charge.
