

August 2023 Dam Report

Submitted by Ed Zimmermann

Problem with ATV rider on the dam and on-going problem of kids throwing rocks into the water from the dam area, I will be submitting a newsletter article on this and have asked Scott Rando to blur the kids faces so that we can put it in the article.

Self-inspection performed. Nothing out of the ordinary was observed. Still need to exercise the valve.

Aqualink appears to have sprayed the weeds along the dam and partway into spillway.

Kiley will be doing the annual dam inspection in the fall as is always done.

No news from DEP regarding repair work, engineer report has not been reviewed by them and sent to Kiley yet.

Seeding of the dam needs to be done. If anyone knows of a local contractor that can do this let me know.
