

Dam Report June 2021

Was in contact with DEP regarding Proof of Financial Responsibility. I was referred to another individual and am waiting for a response on my questions.

Kiley submitted proposal for engineering work relating to hydrologic study and structural analysis as per DEP. This is required prior to any permitting for pipe repair. As mentioned previously, we must meet minimum current standards. Any state permit and application fees would be additional, if applicable. Directly reimbursable fees are not included and would be billed separately.

Proposal is for \$9000.00 and requires board approval to proceed.
